

SOLAR ROOFTOP

B.Grimm, a specialist in solar
rooftop design and installation

Available in PPA and EPC options,
tailored to meet all your needs

**REDUCE ELECTRICITY COST,
OFFER 5-YEAR*
BREAK-EVEN,
FOSTER SUSTAINABILITY**

*Break-even period can vary according to the number of solar panels and weather conditions.

**One-stop
service**

from design,
installation,
to post-sale
services

**Expert team
of solar panel
engineers**

**Customization
to meet specific
requirements**

**Confidence
with a 25-year
warranty on solar
panel efficiency**

**Prompt
support
with 24/7
assistance from
our service team**

**Real-time
monitoring system
for consistent
operation**

Electricity cost

Electricity cost is considered a cost in business operations. Installing a solar panel system can provide an immediate reduction in your electricity bill.

Up to 40% reduction
in electricity cost

Break-even period of
only 4-6 years

Long service life of
over 25 years

Solar Rooftop Solutions

Electricity Cost (THB/month)	Production Capacity (kWp)	Monthly Electricity Saving (THB)	Total Cost (Million THB)	Payback Period (Year)
100,000	120	50,000-60,000	3.5-4.0	5-6
150,000	180	80,000-90,000	4.5-5.5	4-5
200,000	240	110,000-120,000	6.5-7.5	4-5
500,000	480	220,000-240,000	12.0-13.0	4-5
>1,000,000	990	460,000-500,000	23.0-25.0	4-5

Equipment and Services	Warranty
Mono High Efficiency Tier 1 Solar Panel	25-30 years 12 years
• Efficiency • Solar Panel	
Inverter	10 years
Installation	2 years
Post-sale Service	2 years

Three Stages of Our One-Stop Services

Site survey and estimation

A team of experienced engineers will visit buildings or factories to check prospective spots of solar rooftop installation and electricity demand, before performing detailed calculation of the optimal load wattage.

Design and installation

Our experts will design the system that suits specific needs along with an evaluation of the yield and payback period. We will proceed with obtaining permission from government agencies, before delivering system installation and tests.

Help and services

We offer solid warranties of the installation work and electricity production. Our team will keep on services after installation including system monitoring, preventative maintenance program, and 24/7 customer support.
