

Your Trusted Partners in HVAC Solutions for a Sustainable Future

HVAC ENERGY EFFICIENT SOLUTIONS

Our solutions are primarily designed to help businesses save roughly 20% on their energy consumption, significantly cutting CO₂ emissions while ultimately serving better energy efficiency and overall sustainability.

Upgrade the chiller plants with the latest technology and digitalization to enhance efficiency and reduce energy costs, ensuring optimal performance and long-term saving.

Energy cost reduction

Lower electricity bills

Better efficiency

Improve performance and reliability

Budget saving

Decrease operational costs

Experience guaranteed improvements in efficiency and reliability. The chiller plant efficiency guarantee is designed to deliver measurable results and help reduce energy consumption and carbon emissions.

Lower carbon footprints

Align with ESG goals

Comprehensive service and maintenance

Enjoy professional support from HVAC specialists

Flexible investment

Offer customized services upon specific needs and budget

Tailored to optimize energy savings and eco-friendly operations for your businesses

B.GRIMM Technologies

Guaranteed chiller plant performance for complete peace of mind

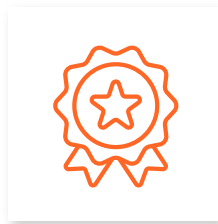

Experience guaranteed improvements in efficiency and reliability. The chiller plant efficiency guarantee solution is designed to deliver measurable results and help reduce energy consumption and carbon emissions.

Key benefits of chiller plant efficiency guarantee

Energy cost reduction
Lower electricity bills

Guaranteed efficiency
Better performance and reliability

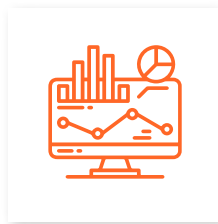

Lower carbon footprints
Align with ESG goals

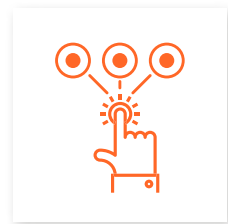

Why guarantee through B.Grimm?

One-stop services
From site survey, system design, equipment supply and installation, to service and maintenance

Real-time monitoring
Transparent data tracking and reporting for enhanced energy optimization

Flexible financing options
Offer upfront, leasing, and Cooling-as-a-Service schemes

Building & Industry

NOVENCO

SCHAKO Group

The World's most efficient fan **NOVENCO® ZerAx®**

Build on the idea of optimising the components that have the greatest effect on the overall system efficiency. With a motor and frequency drive, both reaching 95% efficiency, the NOVENCO ZerAx fan efficiency of 92%, brings **the overall system efficiency to an impressive 85%**.

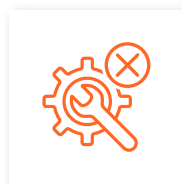

Total Efficiency

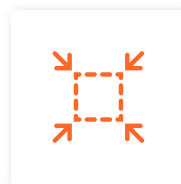

Key benefits of Axial fan

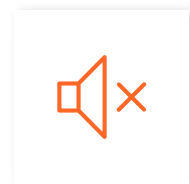

Best in class efficiency
IE5 rating with more than
80% total efficiency

No maintenance
Utilizes permanent
magnet motor

Compact size
Smaller AHU footprint
with high total pressure

Lower noise
Compared to plug fan
and centrifugal fan
